# User Study 02 - RL Audio Notebook

Please click the folliwng two links to read the explanatory statrement and answer the pre-study questionnaire.

**Explanatory Statement:** https://drive.google.com/file/d/1-8npbW1wg_ABzBnnGa1dgEgCaYjDED8o/view?usp=sharing

**Consent Form:** https://forms.gle/eZMYzwaHG4Bqpgp6A

**Pre-study Questionnaire:** https://forms.gle/GAU8xzekWKkTMDLVA (Participant ID Required)

# Setup

**Before starting this Notebook...**

1. **Sub the line of code specifying PWD path** on your device to: ./../RL_audio/notebooks
2. **Install the required packages** (below) to run the notebook
3. **Enable JupyterLab Dark**. Under "Settings" --> Theme --> "JupyterLab Dark" (*Optional but recommended*)

In [1]:
```
%cd /home/liamroy/Documents/PHD/repos/RL_audio/notebooks

# %cd /Users/liamroy/Documents/Studies/Monash_31194990/PHD/repos/RL_audio/no

# %cd <add your path here and comment out the others>
```

```
/home/liamroy/Documents/PHD/repos/RL_audio/notebooks
```

In [2]:
```
PWD = %pwd
```

## Packages

Please install the following:

pygame (see this webpage ~ https://www.pygame.org/wiki/GettingStarted)
jupyterlab, numpy, termcolor, openpyxl, nbconvert-webpdf

Either use:
--> sudo apt-get install <package_name>
--> python3 -m pip install <package_name>
--> conda install -c conda-forge <package_name>

Example using conda:
--> conda install -c conda-forge <package_name>

jupyterlab or notebook
numpy
termcolor
openpyxl
nbconvert-webpdf

# Imports

```

# MAIN STUDY (start here)

Welcome to this study's **Jupyter notebook**. In this work, we are developing strategies for improving human-robot interaction with nonverbal sounds (***beeps & boops***).

This study is best completed with **headphones**. Ensure your volume is on.

While a robot is working on a task, it can have many different internal states. Consider a scenario in which you are guiding a robot as it navigates a maze to find fruit:

If the robot gets lost or stuck behind an obstacle, the robot's internal state is: **Stuck**

Similarly, if the robot was able to reach it's goal (find a fruit), the robot's internal state is: **Accomplished**

If the robot is actively working on the task (navigating through the maze) but has neither gotten stuck nor completed the task, the robot's internal state is: **Progressing**

In this notebook, you will be asked to run through **3 sections**. In each of these sections, a virtual robot will play a sound. Once you listen to the sound, you will be asked to select which robot state you think the virtual robot is in. You will have the options: **Stuck**, **Accomplished**, **Progressing** and **None of the above**.

In addition to each answer, you will also self-score how confident you are in your response, on a scale from 1 to 10.

This process will repeat several times as a learning algorithm is processing in the background. **If you have any questions, ask your study moderator**. Have fun!

## SECTION 1A

**Our first robot is named Jackal.**

Let's listen to **Jackal** make a few sounds to express itself.

For each sound, you will asked to select which robot state you think the robot is in.

**Click on the cell below & hit 'shift + enter'...**

In [6]:
```
mischelp.get_user_accuracy(sound_obj_array=sound_obj_array_A, lib_str=librar
                           states_array=np.ndarray(num_of_states, dtype=obje
```

```
--------------------------------------------------------------------------
--------------------------------------------------------------------------

Robot sound is playing....

What state is the robot in:

[S]: Stuck              - robot is in trouble and needs your help
[A]: Accomplished       - robot has successfully completed it's task
[P]: Progressing        - robot is working and doesn't need help
[N]: None of the above

To replay the sound: leave the input empty and hit 'enter'...
Select a state by entering its first letter [S - A - P - N]:

You entered: P
Progressing     - robot is working and doesn't need help

To replay the sound: Leave the input empty and hit 'enter'...
Score your confidence in this response from [0 to 10]

# Section 3A

We're nearly finished ~ **home stretch!**

Let's listen to **Jackal** express itself one last time.

For each sound, you will asked to select which robot state you think the robot is in.

**Click on the cell below & hit 'shift + enter'...**

In [10]:
```
mischelp.get_user_accuracy(sound_obj_array=sound_obj_array_A, lib_str=librar
                           states_array=np.ndarray(num_of_states, dtype=obje
```

```
--------------------------------------------------------------------------------
--------------------------------------------------------------------------------

Robot sound is playing....

What state is the robot in:

[S]: Stuck              - robot is in trouble and needs your help
[A]: Accomplished       - robot has successfully completed it's task
[P]: Progressing        - robot is working and doesn't need help
[N]: None of the above

To replay the sound: leave the input empty and hit 'enter'...
Select a state by entering its first letter [S - A - P - N]:

You entered: A
Accomplished    - robot has successfully completed it's task

To replay the sound: Leave the input empty and hit 'enter'...
Score your confidence in this response from [0 to 10]
 or
Type 'back' to change your response:

# Section 3B

Lastly, let's listen to **Spot** express itself one last time.

You will notice **Spot** sounds slightly different to **Jackal**. For each sound, you will asked to select which robot state you think the robot is in.

**Click on the cell below & hit 'shift + enter'...**

In [11]:
```
mischelp.get_user_accuracy(sound_obj_array=sound_obj_array_B, lib_str=librar
                           states_array=np.ndarray(num_of_states, dtype=obje
```

```

# Final Results: Jackal

Lets listen to the sounds the Jackal learned to express each of it's 3 states...

**Click on the cell below & hit 'shift + enter'...**

In [ ]:
```
# State 0 - Stuck

mischelp.play_final_sound(sound_obj_array=sound_obj_array_A, lib_str=library
                          states_array=np.ndarray(num_of_states, dtype=obje
```

In [ ]:
```
# State 1 - Accomplished
```

```
mischelp.play_final_sound(sound_obj_array=sound_obj_array_A, lib_str=library
                          states_array=np.ndarray(num_of_states, dtype=obje
```

In [ ]:
```
# State 2 - Progressing

mischelp.play_final_sound(sound_obj_array=sound_obj_array_A, lib_str=library
                          states_array=np.ndarray(num_of_states, dtype=obje
```

## Final Results: Spot

Lets listen to the sounds the Jackal learned to express each of it's 3 states...

**Click on the cell below & hit 'shift + enter'...**

In [ ]:
```
# State 0 - Stuck

mischelp.play_final_sound(sound_obj_array=sound_obj_array_B, lib_str=library
                          states_array=np.ndarray(num_of_states, dtype=obje
```

In [ ]:
```
# State 1 - Accomplished

mischelp.play_final_sound(sound_obj_array=sound_obj_array_B, lib_str=library
                          states_array=np.ndarray(num_of_states, dtype=obje
```

In [ ]:
```
# State 2 - Progressing

mischelp.play_final_sound(sound_obj_array=sound_obj_array_B, lib_str=library
                          states_array=np.ndarray(num_of_states, dtype=obje
```

## Save the Output

Run the following code block to save the output of this Jupyter Notebook.

**Click on the cell below & hit 'shift + enter'...**

In [ ]:
```
file_path_name = "user_data/user_" + current_user_ID_str + "/final_output"

cmd = "jupyter nbconvert --to webpdf --allow-chromium-download study_noteboc
if(os.system(cmd)):
        print("Error converting to .py")
        print(f"cmd: {cmd}")
```

## Closing Survey

Please click the folliwng link to answer a short post-study questionnaire.

**Pre-study Questionnaire:** https://forms.gle/K6RnncY82vSVdyE38 (Participant ID Required)

Thank you for completing this Jupyter Notebook.

## NOTES & DEBUG

**This section is not part of the survey.**
