

User Study 02 - RL Audio Notebook

Please click the following two links to read the explanatory statement and answer the pre-study questionnaire.

Explanatory Statement: https://drive.google.com/file/d/1-8npbW1wg_ABzBnnGa1dgEgCaYjDED8o/view?usp=sharing

Pre-study Questionnaire: <https://forms.gle/GAU8xzekWKkTMDLVA> (Participant ID Required)

Setup

Before starting this Notebook...

1. **Sub the line of code specifying PWD path** on your device to: `./../RL_audio/notebooks`
2. **Install the required packages** (below) to run the notebook
3. **Enable JupyterLab Dark.** Under "Settings" --> Theme --> "JupyterLab Dark" (*Optional but recommended*)

```
In [1]: %cd /home/liamroy/Documents/PHD/repos/RL_audio/notebooks

# %cd /Users/liamroy/Documents/Studies/Monash_31194990/PHD/repos/RL_audio/notebooks

# %cd <add your path here and comment out the others>

/home/liamroy/Documents/PHD/repos/RL_audio/notebooks
```

```
In [2]: PWD = %pwd
```

Packages

Please install the following:

pygame (see this webpage ~ <https://www.pygame.org/wiki/GettingStarted>)
jupyterlab, numpy, termcolor, openpyxl, nbconvert-webpdf

Either use:

```
--> sudo apt-get install <package_name>
--> python3 -m pip install <package_name>
--> conda install -c conda-forge <package_name>
```

Example using conda:

--> conda install -c conda-forge <package_name>

jupyterlab or notebook

numpy

termcolor

openpyxl

nbconvert-webpdf

Imports

```

```

Start by entering your user ID.

Click on the first cell below & hit 'shift + enter'...

```

In [5]: current_user_ID_str = mischelp.get_user_ID(parent_dir=PWD, num_of_states=num_of_states)

```

Great job! You are user: 06

Click on the next cell below and hit 'shift + enter' to continue

MAIN STUDY

Welcome to this study's **Jupyter notebook**. In this work, we are developing strategies for improving human-robot interaction with nonverbal sounds (**beeps & boops**).

This study is best completed with **headphones**. Ensure your volume is on.

While a robot is working on a task, it can have many different internal states. Consider a scenario in which you are guiding a robot as it navigates a maze to find fruit:

If the robot gets lost or stuck behind an obstacle, the robot's internal state is: **Stuck**

Similarly, if the robot was able to reach it's goal (find a fruit), the robot's internal state is: **Accomplished**

If the robot is actively working on the task (navigating through the maze) but has neither gotten stuck nor completed the task, the robot's internal state is: **Progressing**

In this notebook, you will be asked to run through **3 sections**. In each of these sections, a virtual robot will play a sound. Once you listen to the sound, you will be asked to select which robot state you think the virtual robot is in. You will have the options: **Stuck**, **Accomplished**, **Progressing** and **None of the above**.

In addition to each answer, you will also self-score how confident you are in your response, on a scale from 1 to 10.

This process will repeat several times as a learning algorithm is processing in the background. **If you have any questions, ask your study moderator**. Have fun!

SECTION 1A

Our first robot is named Jackal.

Let's listen to **Jackal** make a few sounds to express itself.

For each sound, you will be asked to select which robot state you think the robot is in.

Click on the cell below & hit 'shift + enter'...

```
In [7]: mischelp.get_user_accuracy(sound_obj_array=sound_obj_array_A, lib_str=librar
      states_array=np.ndarray(num_of_states, dtype=obje
```

Robot sound is playing....

What state is the robot in:

[S]: Stuck - robot is in trouble and needs your help
[A]: Accomplished - robot has successfully completed its task
[P]: Progressing - robot is working and doesn't need help
[N]: None of the above

To replay the sound: leave the input empty and hit 'enter'...

Select a state by entering its first letter [S - A - P - N]:

```

```

SECTION 1B

Our next robot is named the Spot.

Let's listen to Spot make a few sounds to express itself.

You will notice Spot sounds slightly different to Jackal. For each sound, you will be asked to select which robot state you think the robot is in.

Click on the cell below & hit 'shift + enter'...

```
In [8]: mischelp.get_user_accuracy(sound_obj_array=sound_obj_array_B, lib_str=library,
                                   states_array=np.ndarray(num_of_states, dtype=object))
```

Robot sound is playing....

What state is the robot in:

[S]: Stuck	- robot is in trouble and needs your help
[A]: Accomplished	- robot has successfully completed its task
[P]: Progressing	- robot is working and doesn't need help
[N]: None of the above	

To replay the sound: leave the input empty and hit 'enter'...

Select a state by entering its first letter [S - A - P - N]:

Great job! The system terminated successfully at itter: 12.
Click on the next cell below and hit 'shift + enter' to continue

 Jackal Robot

Section 3A

We're nearly finished ~ **home stretch!**

Let's listen to **Jackal** express itself one last time.

For each sound, you will be asked to select which robot state you think the robot is in.

Click on the cell below & hit 'shift + enter'...

```
In [ ]: mischelp.get_user_accuracy(sound_obj_array=sound_obj_array_A, lib_str=library,
                                   states_array=np.ndarray(num_of_states, dtype=object))
```

 Jackal Robot

Section 3B

Lastly, let's listen to **Spot** express itself one last time.

You will notice **Spot** sounds slightly different to **Jackal**. For each sound, you will be asked to select which robot state you think the robot is in.

Click on the cell below & hit 'shift + enter'...

```
In [ ]: mischelp.get_user_accuracy(sound_obj_array=sound_obj_array_B, lib_str=library,
                                   states_array=np.ndarray(num_of_states, dtype=object))
```

Final Results

Lets listen to the sounds the robot learned to express each of it's 3 states...

Click on the cell below & hit 'shift + enter'...

In []: *# State 0 - Stuck*

```
mischelp.play_final_sound(sound_obj_array=sound_obj_array_B, lib_str=library  
                           states_array=np.ndarray(num_of_states, dtype=obje
```

In []: *# State 1 - Accomplished*

```
mischelp.play_final_sound(sound_obj_array=sound_obj_array_B, lib_str=library  
                           states_array=np.ndarray(num_of_states, dtype=obje
```

In []: *# State 2 - Progressing*

```
mischelp.play_final_sound(sound_obj_array=sound_obj_array_B, lib_str=library  
                           states_array=np.ndarray(num_of_states, dtype=obje
```

Save the Output

Run the following code block to save the output of this Jupyter Notebook.

Click on the cell below & hit 'shift + enter'...

```
In [ ]: file_path_name = "user_data/user_" + current_user_ID_str + "/final_output"

cmd = "jupyter nbconvert --to webpdf --allow-chromium-download study_notebook.ipynb"
if(os.system(cmd)):
    print("Error converting to .py")
    print(f"cmd: {cmd}")
```

Closing Survey

Please click the following link to answer a short post-study questionnaire.

Pre-study Questionnaire: <https://forms.gle/K6RnncY82vSVdyE38> (Participant ID Required)

Thank you for completing this Jupyter Notebook.

NOTES & DEBUG

This section is not part of the survey.
